

MADBARZ ROUTINES PLAN

CARDIO – BEGINNER

INSTRUCITONS

One week consists of 4 training days – The remaining are rest days to relax your body and get energy for the coming week. These days are important and your body will really need them.

On which days you complete your training is up to you. Please warm up before you start to train and stretch after you have finished. We recommend Jogging, Rope Jumps, Jumping Jacks and Arm Cycles to warm up.

Remember to drink enough water before, during and after the workout. It's very important to keep that in mind. Find the right dose by yourself.

Closing remarks

Keep always in mind, that a transformation is no easy walk, it's a big step forward in your life. You need discipline, willpower and especially fighting spirit to succeed. Grab your chance and try hard to reach something, others will never do! There will always be days when you have no more desire, where the weather is too bad, where you can't see low carb or healthy food anymore. Nevertheless, you must stay tuned and keep going on. Sooner or later you will be rewarded with success! Your body will get used to the change soon and you will feel much better and healthy. Get inspired and find your own way to bring proper nutrition and athletic success into harmony. Do always set small goals for yourself to keep your motivation positive.

Muhammad Ali, one of the greatest of all time sometimes said: "If my mind can conceive it, and my heart can believe it - then I can achieve it." Surrender is no option and should never come to your mind. On lazy days, I used training videos, football pump ups or epic music to motivate myself. After the workout, I felt great and I was glad to overcome myself again.

"I hated every minute of training, but I said, 'Don't quit. Suffer now and live the rest of your life as a champion.'"

Muhammad Ali
